ANL Packaging, close to the customer, all over Europe

Since more than half a century, ANL Packaging develops and produces plastic containers that meet the increasing expectations and demands of both customers and producers. Our customized solutions enable you to deliver your final product in perfect condition to your end customer or consumer in a package that meets the highest standards in terms of product protection, design, quality and durability.

Closed loop vision

With European legislation as a basis we develop bespoke packaging designs that are future-proof. At ANL Packaging we design to recycle. We prefer to use monomaterials that can be easily recycled. We try to use as few additives as possible since they make it harder to recycle. We try to adapt the designs of your packaging where possible to enhance mechanical features, depending less on material characteristics.
ANL Packaging develops thermoformed products for...

CONFECTIONERY
Within the field of packaging for food, ANL Packaging has developed a particular expertise in developing packaging solutions for the confectionary chocolate and biscuit market. Design and

FOOD
